

As a consumer I am concerned of the pending sale of 11 licenses on Rainbow 1 at 61.5 from Cablevision to Echostar.

For VOOM to survive as an independent entity of Cablevision, the FCC should stop the sale of those 11 frequencies to Echostar. VOOM will need these to compete against Echostar and DirecTv. It is in the best interest of consumers to keep a 3rd DBS provider rather than 2. Thank you for listening.
